## GENERAL DESCRIPTION

The Delta **DO5** (short pattern) and **DO9** (long pattern) Light Alloy Jet/Spray Series are popular, low-cost, nozzles suited to a wide range of Industrial applications including general purpose firefighting, wash-down, cooling and dust suppression.

Designed for use with mainline hoselines the DO5 & DO9 provides simple On/Off function and selection between Jet & Spray modes by simple rotation of the front bumper of the nozzle. The DO9 is also available in a Jet Only model where no spray function is required.

Both options are supplied with 2½" Instantaneous male inlet adaptors and boast impact resistant front rubber bumpers for durability and improved resistance to impact.

This range represents incredible value for money and provides multi-use capabilities across a broad spectrum of Industrial Sectors.
