## GENERAL DESCRIPTION

Delta's **Hose Deployment Packs** provide significant firefighter safety advances across a multitude of Industry applications, particularly in High-Rise fire scenarios.

This two-part system comprises the 'Lay Pack' & 'Attack Pack' designed to perform quick, easy, safe deployment of fire hoses in the Cleveland Hose Load.

The 'Lay Pack' self-feeds hose from the pack in a controlled manner as the firefighter advances towards the fire (up the stairwell) eradicating loose hoses strewn across the access path resulting in potential trip hazards and tangled hoses. The 'Attack Pack' is then quickly connected to the 'Lay Pack' and self-deploys the hose (with branch pre-attached) as soon as the line is pressurised.

Delta's Hose Deployment Packs are ideally suited for use in conjunction with Delta Nova Ultraflex Type 3 hose thanks to its 'all nylon' flexibility and ability to remain kink-free at low pressures ensuring water flow is maintained at all times. Delta Hose Deployment Packs can be supplied empty or pre-loaded with equipment ready for use.

## THE RANGE

Product Code	Model	Storage (all items sold separately)
HOM000082	Lay Pack	Hose Line + Breeching
HOM000081	Attack Pack	Hose Line + Door Wedge + Nozzle
