

**DELTA
FIRE**

HOSE ROLLER TROLLEY

**FAST, EFFICIENT HOSE COILING
ELIMINATING BACK INJURIES**

KEY USERS

- Fire & Rescue Services
- Water Companies
- Marine & Off-Shore
- Petrochemicals
- Oil & Gas
- Aviation
- Nuclear
- Waste Recycling
- Civil Defence
- Construction

KEY FACTS

- Fast Hose Recoiling
- No More Back Strain
- Adjustable Hose Guide – up to 76mm
- Multiple Rolling Styles
- Recoils in under 10 Seconds
- Folds Flat for Easy Stowage
- High Quality Construction
- Powder Coated Frame
- Solid Rubber Tyres

**Designed for hoses up to
25m long / 76mm diameter**

Doc Ref: DDS066

GENERAL DESCRIPTION

The Delta **Hose Roller Trolley** is designed to quickly, cleanly and efficiently recoil layflat fire hoses after use saving time and greatly reducing back strain minimising time off work through injury.

Robustly designed and fitted with heavy duty solid rubber tyres the Hose Roller Trolley is capable of use over most terrains and folds flat for ease of stowage. A magnetised support leg ensures stability when dormant.

The adjustable hose guide allows for recoiling of layflat hose diameters of up to 76mm (3") and can recoil lengths up to 25metres with ease. Conventional coiling or Dutch rolling of hoses is possible fitted with any British or International Couplings.

Once recoiled the Hose Roller Trolley is simply tilted left or right and the hose slips off perfectly coiled and ready for re-use.

Commonly used by Fire & Rescue Services but equally suited to any applications that use layflat fire hoses.
