GENERAL DESCRIPTION

Designed for use with Delta's Attack 100 Pro-Series hose reel nozzle, Attack 500 Pro-Series mainline nozzle or Marine Attack 500 off-shore nozzle the Pro-Series LX foam tubes provide the operator with the ability to quickly convert from discharging water to low expansion foam via a secure quick-connect system to the nozzle.

Manufactured in the UK from corrosion resistant hard anodised aluminium the LX foam tubes are incredibly robust yet very lightweight providing easy control to the operator. The innovative dual-clamp system has two independent castellated jaws designed to fit securely around the front rubber bumper of the nozzle. Each jaw is secured in place by twist-lock retaining clamps ensuring a solid, safe connection at all times. Easily attached and removed with a gloved hand the Pro-Series LX foam tubes are suitable for use with all foam types and are capable of producing excellent quality foam up to a range of approximately 24 metres.

THE RANGE

Product Code	Model	Compatible Nozzles	Length	Diameter	Weight
NFT100PRO	LX-100 Pro	Attack 100 Pro	288mm	92mm	0.85 kg
NFT500PRO	LX-500 Pro	Attack 500 Pro Marine Attack	400mm	99.5mm	1.04 kg

Unlike many alternative brands the Delta Pro-Series LX Foam Tubes are incapable of accidentally detaching during use ensuring the safety of the operative and maintaining performance at all times. Commonly used when tackling flammable liquid spills or for safeguarding against fire spread the LX foam tubes are a valuable addition to the armoury of any firefighter.

High quality material and precision engineering make the Pro-Series LX foam tubes a 'best in class' product.
